

# SPRINGFIELD TOWNSHIP WALNUT AVENUE PARK

## FREQUENTLY ASKED QUESTIONS

### 1) Will the development of the park impact the site remediation efforts?

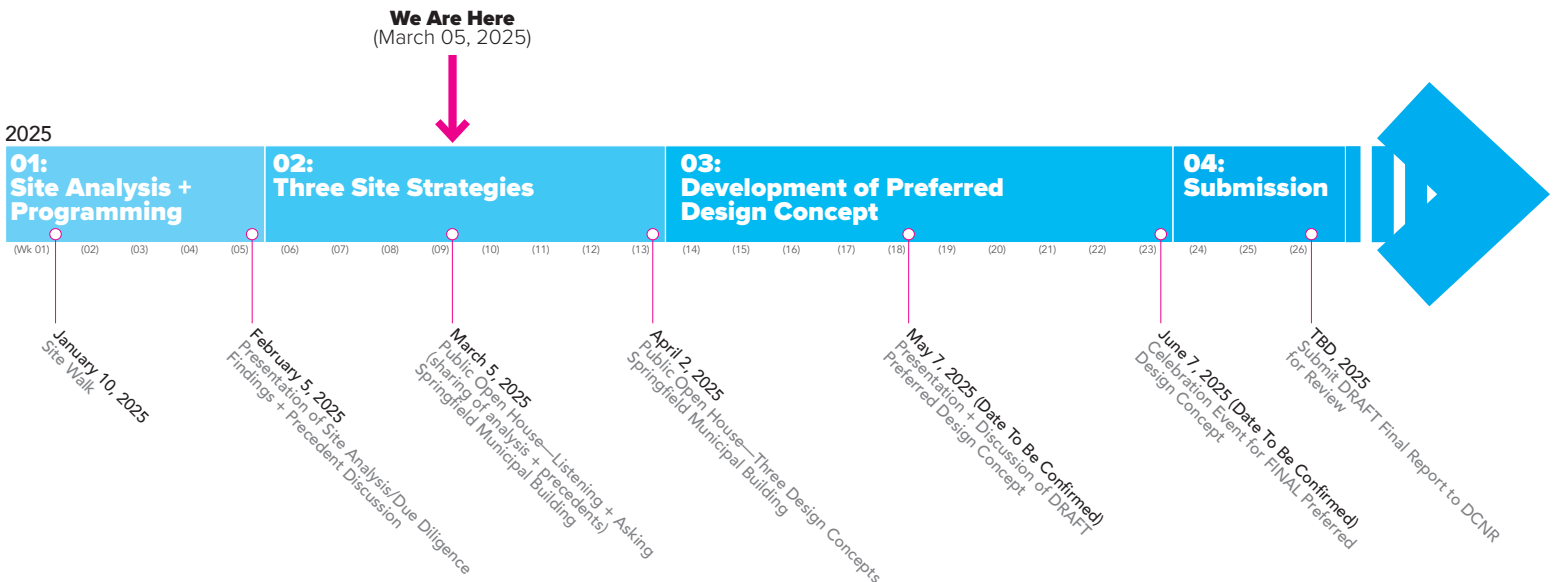

*No, the park will not disturb any of the remediated soils. All future site work will take place on top of any remediated areas with safe separation between areas of occupation and capped contaminated areas.*

### 2) Is it safe to build a park on this site?

*Yes, it is safe to build a park if proper design and construction protocols are followed.*

### 3) When will designs for the park be shared?

*Three design options will be shared at the April 2nd public open house. Community members can give their feedback on the three options at that time. This feedback will be used to guide a preferred design concept which will be shared at the public open house in May for another round of feedback. Based on this feedback a final site design will be developed. Full project schedule below:*

### 4) When will the park be built? How much will it cost?

*The final site design will be compiled into a report that Springfield Township can utilize to guide fundraising and implementation efforts. A final cost and implementation schedule has not yet been determined.*
